Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Shinkai et al (4821504).

Shinkai teaches a rotor spinning machine comprising a plurality of working stations and a bobbin supplying device extending along the machine, wherein at least two service units supplying the working stations with bobbins are supplied by the supply device, and a central machine control device configured to suppress a bobbin request from a second service unit in the event an existing bobbin request from a first service unit until the existing request has been fulfilled by receiving or passing (Shinkai teaches a system of carriages which determines which carriage should service which spinning machines. While a first carriage is servicing one unit, it will not be able to interfere with what a second carriage is doing, thus if the second carriage makes a first request, then the requests of the first carriage will be suppressed since it is already in use, and it will not be able to request something for the unit the second is working on until the second has received its request and moved on).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Iwade et al (5237807), Kallmann et al (4979360), Taniguchi et al (4970856), Karl et al (4840022), and Guttler (4720967) all teach what is well known in the art.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shaun R. Hurley whose telephone number is (571) 272-4986.

The examiner can normally be reached on Mon - Fri, 8:00 am - 4:00 pm.
